### **PRESENTING PHYSICIAN** **Matthew Lawson, MD**

**Neurosurgeon/Endovascular Neurosurgeon**  
**Tallahassee Neurological Clinic**

This presentation will outline:

- Common types of metastatic brain tumors, including diagnosis and their pathophysiology and natural history
- Treatment options, including chemotherapy, surgical resection, radiation therapy and stereotactic radiosurgery
- Current treatment guidelines, including steroids and AEDs
- New and upcoming treatments

The Tallahassee Memorial Cancer Center is home to the region's most advanced radiosurgery system - the Novalis Tx.

This activity has been planned and implemented in accordance with the accreditation requirements and policies of the Accreditation Council for Continuing Medical Education through the joint providership of the Florida Medical Association and Tallahassee Memorial HealthCare. The Florida Medical Association is accredited by the ACCME to provide continuing medical education for physicians.

The Florida Medical Association designates this live activity for a maximum of one (1) AMA PRA Category 1 Credit(s)™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

None of the presenters disclosed any financial relationships with commercial interests whose products or services have a direct bearing on the subject matter of these presentations.
